REASONS FOR ALLOWANCE

Allowable Subject Matter

1. Claims 19-21 are allowed.
2. The following is an examiner's statement of reasons for allowance:

RE claim 19, the prior art of record, and in particular Han et al (USPN 5,369,259), fails to teach or suggest an apparatus comprising a head operating status detector which detects operating conditions of the plurality of magnetic heads; a head operating status signal generator which generates head operating status signals based on the output data of the head operating status detector; the stationary drum being provided with a head operating status signal decoder which discriminates the head operating status signals; and a control signal generator which generates control signals for controlling the recorder/reproducer, wherein the head operating status signals and the control signals are transmitted by the rotary transformer, and the control signal generator generates the control signals based on a result of discrimination of the head operating signal decoder.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
